2. The Department of Defense (DOD) and the Atomic Energy Commission (AEC) have agreed to cooperate with the Department of Interior in the cleanup of the Bikini Atoll for the return of the native population. The cleanup involves the removal of vegetative overgrowth, debris, structures and other materials residual from the use of the Atoll for atomic testing which could pose radiation or accident hazards to the population or interfere with their reasonable use of the land.

4. The DOD and the AEC have agreed to provide \$300,000 each in fiscal year 1969 for the cleanup. Total AEC funding shall not exceed \$300,000 for the entire project and AEC funds shall not be used to pay costs which accrue subsequent to June 30, 1969. The DOD funds will be available for obligations until June 30, 1969. The DOD/AEC funds (\$600,000) will be made available by the AEC to DASA (Nevada Operations Office to CJTF-8) to provide the Project Manager with financial resources to begin the task. Approximately half of this \$600,000 is attributable to the cost of eliminating radiological contamination. Existing DASA-AEC (JTF-8) procedures will be utilized by the Project Manager in providing and accounting for these DOD/AEC funds for payment of the AEC contractor, and to defray transportation, military travel, per diem, and other associated costs attributable to the task and not included under payments to the contractor. It is expected that the same procedures will be followed in respect to the \$700,000 expected to be forthcoming in FY 70 from the Department of Interior.

5. The AEC contractor will provide planning, engineering and technical staff support and labor for cleanup as well as camp support operations and other tasks as determined by the Project Manager. Except for matters pertaining to contract administration, CJTF-8 will exercise operational control over the contractor. Contract administration will be performed by the AEC Honolulu area office.

6. The AEC will be responsible for determining that radiological health and safety requirements are met at the completion of this project. These requirements, as developed in project plans, will be subject to

AEC approval prior to the beginning of field operations. AEC will follow the progress made and keep interested agencies informed.

7. The handling and removal of contaminated scrap will be conducted so that exposures to personnel will be within the standards for workers established by the Federal Radiation Council. The contractor will use Trust Territory island natives as feasible and as determined between the Project Manager and the Trust Territory representative. Trust Territory native residents may not be employed in collecting and removing contaminated scrap material.

8. Equipment or other assets available to the AEC and DOD may be used providing this arrangement is in the best interest of the U. S. Government. If mutually agreed between the providing party and the Project Manager, these assets will be made available to the Bikini cleanup project, at no cost other than for transportation, operating, and maintenance charges, if required.

9. The Bikini cleanup will not interfere significantly with maintenance of the test readiness posture.

10. The Director, DASA as Project Manager will act for the AEC in accordance with the provisions of this memorandum.
